PURE DESIGN, TO COMBINE HISTORY WITH STYLE

The recent restyling of the Hotel Niccolò V has led to a review of the entire concept of hospitality. The choice was to create a very striking contrast between the classic exterior, where the materials of the territory connote every architectural aspect, and the interiors designed to create an immediate feeling of well-being and precious self-care.

*There are no such things as non-places
at Niccolò V. Every environment has its
function of welcoming, protecting and
creating its own space.*

LOOK AT THE ROOMS,
TO GRASP ITS ESSENCE

**EVERYTHING
IS ENLIGHTENED
FROM THE PLEASANT
SENSATION
TO HAVE EVERYTHING,
AND NOTHING LESS.**

THE RESTAURANT

We have a great responsibility. We are in the center of Italy, in a territory so rich in culinary traditions, that everywhere we look we are liable to be overwhelmed. Lazio cuisine, Umbrian cuisine and Tuscan cuisine are the starting point. They have so much in common, but each expresses its own different excellence. Which finds its best expression in our kitchen.

WATERS AND NATURAL MUD

The secret of Terme dei Papi is in the wealth of substances contained in the Waters and Mud. Both are a source of goodness and health that is unparalleled. It is not we who say so, but the countless scientific studies that have highlighted how Waters, thanks to their physico-chemical characteristics and the content of trace elements, are a powerful anti-oxidant and show a number of positive actions on the coating epithelia. The same goes for Mud, divided into Black and White, which have first-rate healing and cosmetic properties, and whose positive effects are widely documented in the scientific literature.

Water in its flow produces different sounds, each with its own spirit. Which become a perfect soundtrack to experience and relive the emotions of Terme dei Papi.

BEATRICE VERA SPA

Today, when the word SPA has almost lost its true meaning, living the experience of a real SPA, designed around water and immersed in an atmosphere of rarefied beauty, of encompassing comfort, of aesthetics geared to self-care, is something absolutely unique. The treatment paths have the person at the center, the only element that must be able to make the most of the ritual of water, of massages, of time dilated until it becomes a flow of well-being that surrounds everything. And transforms the pleasure of living at the Terme into a sublime sensation.

IN THE POOL LYING UNDER THE SKY AND IN THE CAVE HIDDEN FROM VIEW, WATER IS THE QUEEN.

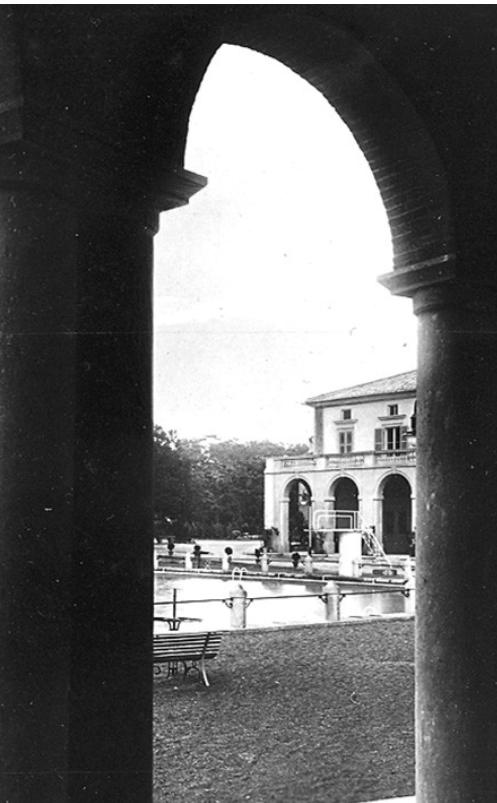

There are two ways to find yourself, thanks to the almost magical power of this water that has extraordinary healing properties. The first is to soak in the monumental pool, where water comes directly from the spring at 136 F gushing from stone grotesque masks. The second is to reach the natural cave excavated in stone, a unique in Italy, where the water that comes from an underground vein brings the temperature of the environment up to 118 F, transforming it into a Turkish bath born from the earth and nature.

THE CHOICE OF THE PONTIFFS

Many are unaware of the complex history that led Viterbo to share with Anagni, Avignon and, of course, Rome the exceptional record of being a papal seat. It all began with Alexander IV, who, to escape the violence ripping through Rome, moved the papal court to Viterbo in 1257. This change made the city of upper Lazio increasingly beautiful, enriching it with churches and monuments that lived up to its papal mission.

Today many of those monuments remain, and especially the word conclave, reminiscent of when the pope's electors were locked (cum clavis) in the Palace of the Popes, to push them, after months of procrastination, to elect Peter's new successor.

All the excitement and magic of the spa,
downloadable in **English**.
